Skills

- HTML | Css | Sass | Bootstrap | Javascript | jQuery | TypeScript | React | Redux | Node | Express.
 - Frontend | Backend | FullStack | Unit Testing | Manual Testing | svn | Git | Sql | C | C++ | Java | Python.
-

Experience

Tata Consultancy Services, Gujarat, India

Front-end Developer

Feb 2022- June 2021

- Coordinated the design and development of web applications of Digigov framework using the latest technologies of Html, Sass, Bootstrap, Json, Javascript, jQuery.
- Led the development of more than 60 screens, from identifying system requirements and partner dependencies to workload balancing, software implementation, testing, and configuring metrics.
- Handled dynamic data using json for more than 30 screens and collaborated with backend developers to fetch user data and requests.
- Continuous integration, deployment, code reviews, unit/integration testing.

Quality Assurance Tester

May 2021- Feb 2021

- Performed portal testing effectively, on time, with the expected level of quality.
 - Created test cases and performance test scripts based on portal requirements and functionality specifications.
-

Education

Gokaraju Rangaraju Institute of Engineering and Technology

Bachelors in Computer Science and Engineering

Oct 2020 - Aug 2016

- Cumulative GPA : 8.27 / 10
 - CourseWork: Advanced Data Structures, Big Data Analytics, Artificial Intelligence, Design and Analysis of Algorithms.
-

Academic project

Vision Sentiment Analysis - Python OpenCV

June 2020 - Jan 2020

- Coordinated in the development of the algorithm that uses visual stimuli as input, preprocesses the input data, and then automatically looks for faces, identifies them, and describes the emotion detected.
 - As the project's specialist, I entirely focused on the technical aspects and coded the algorithm.
-

Certifications and Badges

- Advanced React by Coursera, 2022.
- Programming with JavaScript by Coursera, 2022.
- React (Basic) by HackerRank, 2022.
- Microsoft Technology Associate: Networking Fundamentals - Certified 2017
